FOR IMMEDIATE RELEASE

iMedX Announces Acquisition of LS Services Inc.

LS Services acquisition marks expansion into hospital and government markets.

SHELTON, Conn. — Mar. 3rd, 2008 — iMedX Inc., a leading healthcare software and services company, announced today that it has acquired LS Services Inc., (LS). LS, founded in 1990, currently serves hospitals and state governments across the country, with a US-based transcription workforce. With the acquisition of LS, iMedX gets deeper penetration into hospitals and the government market, and expands its in-house and home-based network of US-based medical transcriptionists. LS's offices in Ohio will be used as a base to expand iMedX's US-based transcription workforce. Using iMedX's revolutionary TurboScribe® platform for medical transcription, iMedX's customers enjoy the benefit of an efficient transcription workflow and ease of management. With TurboScribe's integration with leading Electronic Medical Record (EMR) products, iMedX's customers will progress towards a paperless environment and a higher quality of care. LS's customers will benefit from the ease of use of the TurboScribe® technology and will see efficiencies in the paperless workflow that TurboScribe® provides. Additionally, LS's customers can take advantage of iMedX's other Internet-based products such as its TurboRecord® - iMedX's low-cost EMR, and their ePrescribing product TurboRx® for error-free prescribing through pharmacies across the country.

Venkat Sharma, iMedX's president and CEO, along with the current iMedX management team, will continue to lead the two companies. LS will operate as a wholly-owned subsidiary of iMedX, as an Ohio corporation. The LS team will continue servicing LS customers as Brad and Susan Runyon, the founders of LS, work toward rapid growth in the institutional market of hospitals and the government. LS's 10,000 square foot offices in the tri-state area of Southern Ohio/Kentucky/West Virginia will help the local community through iMedX's planned growth in that area.

“In this global economy it is important to balance high-quality resources to ensure 24x7 availability for the critical needs of patient care” stated Venkat Sharma, iMedX's president and CEO. “Forward-thinking companies, such as iMedX, with a scalable and seamless worldwide workforce and powerful technology to automate medical documentation management, are instrumental in achieving significant improvement in the quality of care. With providers and government workers in multiple locations at all hours, it is imperative to use the online delivery and availability of medical documentation that iMedX provides. With the addition of LS, iMedX acquires a secure facility servicing government and hospitals

iMedX Announces Acquisition of LS Services Inc.

with in-house transcriptionists, thus providing an opportunity for direct supervision and training of US medical transcriptionists in a secure office setting. This is unique in the industry.”

Mr. Sharma adds “Following on the heels of our acquisition of MR Transcription last October, this acquisition is an essential part of our strategy to grow through direct sales as well as acquisitions, and propagate TurboScribe® software throughout our customer base, concurrently rolling out other products to help the physician lower costs and increase revenues. Through this strategy iMedX intends to grow into a major force in the clinical documentation software and services industry.”

About iMedX, Inc

iMedX is a leading US-based outsource provider of healthcare software and services to hospitals and medical practices throughout the U.S. iMedX’s innovative Internet-based transcription delivery platform, TurboScribe® is used by thousands of providers across the United States.
